DETAILED ACTION

1. The Amendment filed on 7-June-2006 has been received and entered. Claims 1-5, 13-24 and 32-49 have been cancelled. Therefore, claims 6-12, and 25-31 are now pending.
2. Applicant's amendment has overcome previous rejections under 35 USC 101, and 112, second paragraph.

Double Patenting

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 1, and 25 are provisionally rejected under the judicially created doctrine of double patenting over claims 1, 16, and 32 of copending application Serial No. 10/960,741. This is a *provisional* double patenting rejection since the conflicting claims have not in fact been patented.

For example, claim 1 of the instant application directed to “database of specification”... “defining for each product class a schema”... “providing an interface”...and “in exchange for remuneration” is similar and perhaps arguably broader to those same steps recited in claim 1 of co-pending application 10/960,741.

The subject matter claimed in the instant application is fully disclosed in the referenced copending application and would be covered by any patent granted on that copending application since the referenced copending application and the instant application are claiming common subject matter.

Claim Rejections - 35 USC § 112

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claim 25 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 25, recite, “allowing entry” or “permits” (i.e. allowing or permitting the computer to do something) such claims require is that a reference does not prohibit a computer from doing the recited acts. They do not cause any functionality to occur in the computer. Thus failing to particularly point out and distinctly claim their invention (it's unclear what Applicant's intended metes and bounds of the claim are, since the claim appears to cover anything and everything that does not prohibit actions from occurring). There need to be firm language to the actual functionality taking place and not merely a recitation of its capability such as “which enters” or “to enter”.

Allowable Subject Matter

7. Although no rejections in view of prior art are made, no claims in this application will be indicated as allowable until after a response to this action has been reviewed, as to the fact that certain changes may not produce allowable claims.

Response to Arguments

8. Applicant's arguments filed on June 7, 2006 have been fully considered but they are not persuasive.

The Examiner maintains the Double Patenting rejection with co-pending application No. 10/960,741, although the application has not been examined yet, however, claim 6 of the instant application recite similar language to application' 741, specially claim 1 stating the steps “hosting...defining...providing an interface...and in exchange for remuneration”.

The Examiner contends that a Terminal Disclaimer is still required.

Conclusion

9. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
